PROFESSIONAL SUMMARY

Backend developer with formal training from ALX Africa (Python, Django, MySQL, PostgreSQL, RESTful APIs) and hands-on self-built expertise in Node.js, Express.js, MongoDB, and application security. Currently working part-time at Digibiashara — a web and app agency — building and securing RESTful APIs for client projects. Pursuing a BSc in Information Technology at Kisii University, with strong foundations in networking, databases, and system design. Focused on clean API architecture, secure systems, and scalable backend infrastructure.

📁 PROFESSIONAL EXPERIENCE

Digibiashara

Backend Developer (Part-Time)

04/2025 – Present | Nairobi, Kenya

Digibiashara is a digital agency that builds websites and applications for clients across various industries, helping businesses grow their online presence.

- Design and develop RESTful APIs consumed by client-facing web and mobile applications, ensuring consistent, well-documented endpoint contracts.
- Implement application security measures including JWT-based authentication, role-based authorisation, input validation, and protection against common API vulnerabilities (injection, CORS misconfiguration, insecure headers).
- Architect and manage backend databases (MongoDB, MySQL) for client projects, including schema design, indexing, and query optimisation.
- Integrate third-party services and handle file uploads, media management, and storage workflows using Cloudinary and Multer.
- Collaborate with the client delivery team to scope backend requirements, review API integrations, and ensure deployments meet performance and security standards.

Stack: Node.js, Express.js, MongoDB, MySQL, JWT, Cloudinary, Render

🎓 EDUCATION & TRAINING

BSc Information Technology (In Progress)

Kisii University

09/2024 – Present | Kisii, Kenya

Relevant coursework: Computer Networking, Databases, Operating Systems, System Analysis & Design, Software Engineering, Cloud Computing, Computer Architecture.

Backend Web Development — Graduate

ALX Africa

06/2025 – 03/2026 | Nairobi, Kenya

- Intensive bootcamp covering Python, Django, MySQL, PostgreSQL, RESTful API design, backend architecture, and scalable systems.
- Built production-style backend projects with focus on API development, database design, and secure authentication.

TECHNICAL SKILLS

Backend & APIs

- Node.js & Express.js
- Python & Django
- RESTful API Design & Development
- JWT Authentication
- Session Management
- Middleware Architecture
- Rate Limiting & Input Validation

Application Security

- Authentication & Authorisation
- HTTPS & Secure Headers
- SQL & NoSQL Injection Prevention
- CORS & CSRF Protection
- Password Hashing (bcrypt)
- Environment & Secrets Management

Databases

- MongoDB
- MySQL
- PostgreSQL
- Database Design & Normalisation
- Mongoose ORM
- SQL Query Optimisation

Tools & IT Foundations

- Git & GitHub
- Postman (API Testing)
- Render / Railway (Deployment)
- Cloudinary & Multer (File Handling)
- Computer Networking & OS
- System Analysis & Design

PROJECTS

Full-Stack Creator Platform

Social & Creator API Backend

In Development Stack: Node.js, Express.js, MongoDB, JWT

- Architected a multi-user backend with JWT authentication, protected route middleware, and role-based access control.
- Designed MongoDB schemas for users, posts, likes, replies, and follow relationships; built a RESTful API covering full CRUD operations.
- Applied security hardening: bcrypt password hashing, environment variable management, rate limiting, and input sanitisation.

Hospital Management System API

Backend API for Patient & Staff Records

Stack: Python, Django, PostgreSQL

- Built a Django REST Framework API managing patient registration, appointments, staff roles, and medical records.

- Implemented role-based authorisation (admin, doctor, nurse) and secured sensitive patient data with proper permission classes.

E-Commerce Backend

REST API for Product, Cart & Order Management

Stack: Node.js, Express.js, MongoDB, JWT

- Developed product catalogue, shopping cart, and order management APIs with authenticated user sessions and admin controls.
- Integrated Cloudinary for product image uploads and implemented full order lifecycle management endpoints.
